# Geometric Amoebot Model

# Geometric Amoebot Model

## ■ Reconfiguration

## ■ Locomotion

# Joint Movement Extension

Feldmann, Padalkin, Scheideler, Dolev:  
Coordinating Amoebots via Reconfigurable Circuits.  
J. Comput. Biol. 2022

# Joint Movement Extension: Expansion

# Joint Movement Extension: Contraction

## Joint Movement Extension: Conflicts and Collisions

(a) Contraction primitive

(b) Realignment primitive

(c) Rotation primitive

(d) Slide primitive

(e) Tunnel primitive

## Rhombical Meta-Modules: Realignment Primitive

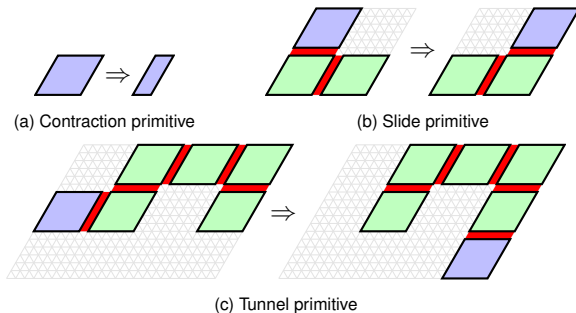

## Crystalline Atoms

Aloupis, Collette, Demaine, Langerman, Adinolfi, Wuhrer:

Reconfiguration of cube-style modular robots using  $O(\log n)$  parallel moves.

ISAAC 2008
